

## About Our College / Centre

Eclipse is probably unique in Europe offering a broad range of subjects on a short courses. Students who have been on an Eclipse course say that they are amazed at the breadth of subject matter covered.

You will gain in confidence in your photographic ability; have fun learning; enjoy excellent hospitality and have the opportunity to make new friendships.

Many students return for advanced courses on lighting, portraiture, still life, sports action and printing or join one of our holiday courses.

During the past eleven years we have been several times to places in France, Spain, & Sicily and this year will be travelling to Provence in the South of France.

The Essence of Eclipse is to excite and inform all-comers into creating photographs that have a strong emotional impact on the viewer.

It is only STILLS PHOTOGRAPHY which enables us all to study the finest of detail, and Emotions of Life. One has to be able to time squeezing the shutter button (avoiding camera shake) at that split second capturing the essence of subject's mood, movement, & emotion; and in it's time sensitive surroundings (meaning - time of day, year, altitude, location and weather).

Then there is the way the light falls on the foreground, subject, and background, and the quality & colours of light that create even more evocative effects.

Choosing what to photograph can be simple, but also very complex.

All is included in the range of courses we offer.
