The Title of this course is:

Photoshop and Wireless Transmission etc. [PWT]

To enroll on it, Mike feels it necessary to talk to his clients and view a sample of their work to establish the target to which they wish to achieve.

An example could be a bigger improvement in their photographic style. However, these areas of study and practice can be most complex, and we advise participants to only engage in the particular parts which are allied to their need Maybe experimental horizons, or their area of client based commissions.

This PWT necessarily overlaps into our Creative Image Building Course but it's not possible to be as thorough as this special one. It can be included in our 1-2-1, and Advanced Bespoke courses in a small way.

Help extends to queries, and practical demos, explanations as to the correction of frequent mistakes, and misunderstandings commonly found in photographic image manipulations.

Please call Mike to discuss your needs & Su to arrange dates, times, preparation, and fees on +44(0)1323 509035
